

SILENCER III

for  **DEKTON®**

THE ALPHA® SILENCER III for Dekton®...

is a technologically advanced blade that produces excellent cuts while achieving superior cost-performance with reduced noise levels. The uniquely designed core is made of two hardened steel sheets with a thin copper sheet laminated between them. This special construction dissipates the usually high noise levels common to this application.

Special diamond grits and a newly developed bonding system along with a narrow segment slot and fish hook laser-cut expansion slot design, minimizes the chipping on the sharp edges even on miter cuts of Dekton®.

The Alpha® Silencer III for Dekton® is available in 12", 14", 16" and 18" with a 60mm arbor and 50mm adapter that are the common sizes of bridge saws. Other adapters are available to reduce the arbor size. With a 10mm segment, that was specially formulated for ultra-compact surfaces, the Alpha® Silencer III for Dekton® will provide excellent cost-performance and reduce noise levels while maintaining the highest quality cut.

A technologically advanced blade that produces excellent cuts while achieving superior cost-performance with reduced noise levels.

| PART NO. | SIZE | MAXIMUM RPM | TYPE | ARBOR(S) |
|----------|------|-------------|---------|------------|
| SLW1210D | 12" | 6,200 | Dekton® | 60mm, 50mm |
| SLW1410D | 14" | 4,365 | Dekton® | 60mm, 50mm |
| SLW1610D | 16" | 3,820 | Dekton® | 60mm, 50mm |
| SLW1810D | 18" | 3,395 | Dekton® | 60mm, 50mm |
