

Numero Uno

Alpha® Numero Uno is designed for cutting granite, marble and engineered stone. It is available in sizes to fit most tub and tile saws and our AWS-110 and AWS-125 Wet Stone Cutters. For the longest time, tile installers used expensive dry cutting blades to cut harder types of natural stone tile because there were no blades available designed to cut harder materials with wet saws. Alpha® Numero Uno is the first diamond blade developed specifically to fill this void, and it has lowered the cost of installing granite and harder types of natural stone tile. Tile installers and tile shops will find that Alpha® Numero Uno will cut the most difficult natural stone tiles quickly and efficiently. The advanced style rim reduces the risk of chipping and breaking while providing accurate and safe cuts. Alpha® Numero Uno is cost-effective and easy to use. Its unique design and capability make the Alpha® Numero Uno the number one choice of blades for tile contractors and tile shops.

PART NO.	SIZE	MAXIMUM RPM	ARBOR(S)
GM05A+	4-1/2"	13,200	7/8", 20mm
GM05S	5"	12,200	7/8"
GM06A+	6"	10,100	5/8"
GM08A+	8"	7,400	5/8"
GM10A+	10"	5,900	5/8"
